                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 4, Application US/09973963

Patent No. 6653102

GENERAL INFORMATION:

APPLICANT: Roch, Jean-Marc

APPLICANT: Bartel, Faul L.

APPLICANT: Heichman, Karen

TITLE OF INVENTION: Diseases

TITLE OF INVENTION: Diseases

TITLE OF INVENTION: Diseases

FILE REFERENCE: Protein Interactions in Neurodegenerative

TITLE OF INVENTION: Diseases

FILE REFERENCE: Protein Interactions in ND

CURRENT APPLICATION NUMBER: US/09/973,963

CURRENT FILING DATE: 2001-10-11

PRIOR PLING DATE: 2001-10-11

PRIOR PLING DATE: 2001-00-11

PRIOR PLING DATE: 2001-07-13

NUMBER OF SEQ ID NOS: 8

SOFTWARE: PatentIN Ver. 2.0

SEQ ID NO 4
